Dear Hiring Manager:

Thank you for your time in reading my cover letter. This is a test run for a school project for which our experimental design would require automatic mass application to LinkedIn job posts satisfying certain requirements.

Throughout my career, I have contributed to impacting business outcomes through effective organization, prioritization, and execution of key projects. My skills and qualifications are an ideal match to the Data Scientist requirements and will bring immediate value to your goals.

Previously, in my Business Intelligence Analyst role, I exercised a calculated and methodical approach to problem solving. I am independently motivated, yet I appreciate team efforts and collaborate productively within groups. Additionally, I am knowledgeable in requirements gathering and research with proficiency in model evaluations.

Because my professional goals align with your mission and values, this opportunity is especially exciting. I believe my problem-solving, critical thinking and innovation abilities will support and drive your continued organizational success.

To demonstrate the scope of my career history and professional competencies, please take a moment to review my attached resume. I appreciate your evaluation of my credentials and subsequent response.

Sincerely  
Coco Cao
